

**SUPPLEMENTAL LABELING**  
**FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF CALIFORNIA**

**ALCO**® **CITRUS FIX**  
**EPA REG. NO. 5481-145**  
**EPA SLN NO. CA-040027**

The State of California Department of Agriculture classifies this ester of 2,4-D as “Highly Volatile” and therefore does not permit its use as a herbicide in California.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in possession of the user at the time of pesticide application. **Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.** Do not apply this product through any type of irrigation system other than described on this label.

**Use Precautions**

- ALCO CITRUS FIX is a plant growth regulator for use on citrus only. Do not use as a herbicide!
- Do not use on citrus trees less than 6 years old.
- Do not apply during a flush of leaf growth.
- Do not apply within 7 days of harvest.
- Do not allow drift to susceptible plants, which include but not limited to: cotton, grapes, roses, beans, peas, alfalfa, lettuce, ornamentals and broadleaf plants. This product may injure cotton, beans, peas, grapes, ornamentals, etc. (coarse sprays are less likely to drift).
- Do not use equipment that has been used to spray ALCO CITRUS FIX to spray 2,4-D sensitive plants. Always use caution in disposing of spray solutions as they can cause extreme injury or kill sensitive plants.
- Before using spray equipment for any other purpose, thoroughly clean same with hot soap suds followed by soaking and washing with ammonia or baking soda.

**Use Directions**

The following “Use Directions” as well as the above “Use Precautions” are taken from data developed and published by the University of California Experiment Station, Riverside, California.

**Mixing Directions**

Carefully measure and accurately add the required quantity of ALCO CITRUS FIX to the spray mixture. Add only during the agitation of the spray material.

---

## **INCREASING FRUIT SIZE IN MANDARINS AND MANDARIN HYBRIDS**

---

Fruit sizing sprays require excellent coverage. A minimum of 500 gallons per acre for mature trees is recommended. Apply ALCO CITRUS FIX using air blast sprayers or other suitable ground spray equipment. Make one application at the rate of 0.67 oz/100 gallons of water, 21 to 35 days after 75% petal fall.

**IMPORTANT: Any equipment used in spraying any product containing 2,4-D should not be used to spray 2,4-D sensitive plants. In disposing of solutions of 2,4-D, it should be borne in mind that they can cause extreme injury or death to sensitive plants.**

**Read the entire Directions for Use and the Limited Warranty and Disclaimer before using this product.**

Valid until withdrawn, suspended or canceled by the United States Environmental Protection Agency (US EPA), the manufacturer, the 24(c) registrant, or the Department of Pesticide Regulation.
