

**Supplemental Use Directions for
 Applications in Corn to Control Sugarcane
 Beetle**

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the Environmental Protection Agency (EPA).

DIRECTIONS FOR USE AND RECOMMENDED APPLICATIONS OF SMARTCHOICE 5G

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

SmartChoice 5G may be applied at planting in field corn, seed corn, sweet corn and popcorn for the control of sugarcane beetle (both adult and larval stages). Granules must be applied directly into the open seed furrow with seed at planting, and completely covered with soil. All use directions and precautions on the SmartChoice 5G federal label must be followed.

Crop	Pests	Ounces per 1,000 row ft	Pounds/Acre on 30" row spacing	Recommended Application
Field corn – all types including hybrids with herbicide and insect tolerance traits Seed Corn Sweet Corn Popcorn	Sugarcane Beetle	4.5 to 5.0	4.9 to 5.4	Apply granules directly into the open seed furrow at planting, ensuring that granules are completely covered with soil when the furrow is closed.

Restrictions:

Do not make more than one application per year.

All applicable directions, restrictions and precautions on the EPA-registered label for SmartChoice 5G are to be followed.

The label must be in the possession of the user at the time of pesticide application.
