## 720 SST Fungicide

Superior disease control for tomatoes now available from AMVAC

With EQUUS<sup>®</sup> 720 SST Fungicide from AMVAC, tomato growers have a powerful tool in the fight against diseases that attack not only the foliage but also the fruit. A cornerstone of disease management programs in tomatoes, EQUUS provides excellent activity on early blight, gray leaf mold, gray leaf spot, late blight, Septoria leaf spot, target spot, Alternaria fruit rot (black mold) and anthracnose.

With excellent crop safety and multi-site modes of action, tomato growers will achieve the best results when using EQUUS as part of a disease program based on pest pressure and plant size.

### EQUUS QUICK FACTS:

Active Ingredient: Chlorothalonil

Fungicide Group: M5 with low potential for resistance development

Signal Word: Warning

Formulation: Flowable

Registered Crops: Almonds, tree fruit, peanuts, potatoes, tomatoes and more

Packaging: 6 lb./gallon

PEST	USE RATE	SEASONAL LIMITS	APPLICATION GUIDELINES
<b>Foliage</b> Early blight Gray leaf mold Gray leaf spot Late blight Septoria leaf spot Target spot	1.37 – 2.0 pts./A	20 pints per acre, per year	Use in sufficient water to obtain adequate coverage, applying by ground, air or chemigation. Begin applications when dew or rain occurs and disease threatens. Apply every 7 to 10 days for foliage diseases. For fruit diseases, begin at fruit set and apply every 7 to 14 days. Do not apply at less than 7-day intervals. Use the highest rate and shortest interval when disease is severe. EQUUS 720 SST may be applied the day of harvest.
<b>Fruit</b> Alternaria fruit rot (black mold) Anthracnose Boytrytis gray mold Late blight fruit rot Rhizoctonia fruit rot	2.0 – 2.75 pts./A
