**SWEET POTATOES**

# NEMATODE AND INSECTICIDE CONTROL FOR SWEET POTATOES

---

## **Broad Spectrum Control**

Controls most nematode species, wireworms and other insect pests

---

## **Application Flexibility**

MOCAP<sup>®</sup> is available in both a liquid formulation (MOCAP EC) as well as a granular formulation (MOCAP 15G) for use in sweet potatoes

 **AMVAC**<sup>®</sup>

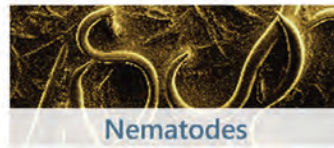

# SWEET POTATOES

## Broad Spectrum Control

MOCAP formulations provide sweet potato growers with dependable control of damaging nematodes and soil insects, including wireworms. This broad spectrum control consistently provides high yielding, quality sweet potatoes. MOCAP is active on a wide range of nematodes that reduce sweet potato yields.

### Labeled Pest Control for Sweet Potatoes

- |                        |                                 |
|------------------------|---------------------------------|
| Nematodes              | Wireworms                       |
| Banded cucumber beetle | Sweet potato flea beetle larvae |
| White grubs            | Palestriped flea beetle larvae  |

MOCAP Formulation	Rate per 1,000 row feet	Rate per acre (based on 42 in. row)
MOCAP EC	5.1 to 6.9 fluid ounces	0.5 to 0.67 gallons/acre
MOCAP 15G	1.6 to 2.1 lbs	20 to 26 lbs/acre

**Application Timing:** 2-3 weeks before planting • **Must be applied by band application on row**

### Packaging Options

**MOCAP EC** - Available in convenient 2.5 gallon jugs.

**MOCAP 15G** - Available in the Lock'N Load Closed Loading system or 30 lb. bags.

- Your retailer or sales rep can provide information on obtaining LNL lids or valves to fit your hopper boxes.

### Application Instructions

- Apply recommended rate of EC or 15G in a band 12 to 15 inches wide on the row (minimum 42 inch row spacing).
- Mix with the top 2-4 inches of soil with mechanical equipment right after application.
- Good results have been obtained by opening the row, applying product in a 12-15 inch band on the row, bedding over and dragging.
- Restriction:** Make only 1 application of Mocap EC or Mocap 15G per growing season.

Always consult label for specific information

## Summary

MOCAP is a unique non-fumigant option for residual control of key nematode and insect pests for consistently high yielding and high quality sweet potatoes.
