

When hurricanes hit and mosquitoes invade, it's Dibrom Concentrate and Trumpet to the rescue.

The insecticides used by local, state and federal disaster and health agencies across the United States.

Hurricanes disrupt normal mosquito control operations and create the ideal environment for mosquitoes to multiply and spread diseases, such as malaria and West Nile Virus. When applied properly Dibrom[®] Concentrate and Trumpet[®] will bring the mosquito population back under control with virtually no risk to people or the environment. And now there's also a special equipment program to help purchase and maintain your application equipment.

For more information on how to incorporate Dibrom Concentrate and Trumpet into your mosquito control program, contact AMVAC toll-free at 1-888 GO AMVAC (1-888-462-6822) or visit www.amvac-chemical.com.
